Professional Summary

Junior Software Engineer with hands-on experience building and deploying full-stack web applications using React, JavaScript, TypeScript, Node.js, Express.js, REST APIs, GraphQL, and database technologies. Experienced in developing responsive user interfaces, backend services, authentication systems, API integrations, and reusable software components. Strong foundation in debugging, testing, Git workflows, Agile collaboration, and software development lifecycle practices. Seeking a Junior Software Engineer or Full-Stack Software Engineer role to contribute to production software and continue growing as an engineer.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3
Frontend: React, Tailwind CSS, React Router, Responsive Design, Component-Based Architecture
Backend: Node.js, Express.js, REST APIs, GraphQL, Authentication & Authorization
Databases: MongoDB, MySQL, SQL Fundamentals
Tools & Platforms: Git, GitHub, Google Cloud, Postman, Swagger/OpenAPI, Jira, Webpack
Software Engineering: Agile/Scrum, Code Reviews, Debugging, Testing, CI/CD Concepts, Software Development Lifecycle
Development Practices: API Integration, Reusable Components, Backend Architecture, AI-Assisted Development

Software Engineering Experience

Independent Software Engineer
Independent Development Projects/ Self-Employed — Remote
July 2025 - Present

- Develop responsive full-stack web applications using React, JavaScript, HTML, CSS, and Express.js.
- Built reusable frontend components and backend REST APIs.
- Translate client requirements into functional software solutions with a focus on usability.
- Debug, test, deploy and maintain applications using Git, and modern development workflows.

Nexus Partner Pipeline C7
Software Engineering Extern — Remote
January 2026 - March 2026

- Developed a responsive dashboard application using React, TypeScript, and Tailwind CSS.
- Integrated frontend functionality with GraphQL APIs and MySQL-backend services.
- Collaborated with stakeholders and engineering team to develop and deliver software solutions.
- Debugged application issues, incorporated feedback and improved the application.

TripleTen — Remote
Software Engineering Tutor (Volunteer)
December 2024 – Present

- Mentored students in full-stack development including React, JavaScript, backend APIs, and databases
- Assisted students with debugging, software architecture decisions, and implementation best practices.

- Guided students through real-world coding challenges and technical problem solving.
- Fostered collaborative learning environments and effective technical communication.

Selected Projects

News-Explorer | Full-Stack Application
Live Application: **https://news-explorer-tawny.vercel.app/**
Technologies: React, JavaScript, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt

- Developed a full-stack news application featuring user registration and secure authentication.
- Built RESTful backend services using Node.js and Express.js , implementing protected API routes.
- Integrated MongoDB to manage user accounts and save articles for every user.
- Deployed frontend and backend applications using Vercel and Render.

Authentication API System | Backend Project
GitHub Source: https://github.com/Agent610/Authentication-API
Technologies: Node.js, Express.js, MongoDB, JWT, bcrypt, Zod, Nodemailer, Swagger, REST APIs

- Built a secure REST API for user authentication and authorization.
- Implemented JWT authentication, refresh token workflows, and role-based access control.
- Applied request validation, password hashing, and security-focused development practices.
- Structured backend architecture using controllers, middleware, services, and utilities.

Lazeez Pakwan Restaurant Website | Frontend Application Client Project
Live Application: https://lazeez-pakwan.vercel.app/
Technologies: React, Vite, JavaScript, CSS

- Designed and developed a responsive website for a real restaurant client.
- Built reusable React components and client-side navigation using React Router.
- Integrated restaurant menu information, catering details, business hours, and photo gallery.
- Translated client requirements and tested layouts and navigation across multiple screen sizes.

Additional Professional Experience

Burlington Coat Factory — Danbury, CT
Team Lead → Receiving Associate → Receiving Lead → Receiving Associate
May 2018 – Present

- Process incoming merchandise, scan and unload deliveries, and organize inventory.
- Supported managers with scheduling and truck coordination as Team Lead and Receiving Lead.
- Collaborated across departments to maintain productivity and efficient daily operations.

Education

TripleTen | Software Engineering Program: — Professional Certification | Remote
October 2023 - July 2025

- Completed 1,000+ hours of hands-on full-stack software engineering training.
- Developed full-stack applications using React, Node.js, APIs, and modern databases.
- Gained experience with authentication, software architecture, deployment, and Git workflows.
